

Inventory of Practices for Promoting Children’s Social Emotional Competence Center on the Social and Emotional Foundations for Early Learning

Purpose of the Inventory: *The Inventory of Practices for Promoting Social Emotional Competence* is designed to be used by individuals and/or teams to identify training needs and plan a course of action to address those needs related to four general areas: (a) building positive relationships, (b) creating supportive environments, (c) social emotional teaching strategies, and (d) individualized intensive interventions. The *Inventory* encourages individual self-reflection, opportunities for teaming between classroom teachers, mentor coaches, supervisors, site directors, and other administrators, and promotes effective practices for direct service staff. There are two sections to this tool: the Inventory of Practices and the Action Plan.

Use of the Inventory: This tool is best utilized in a manner that encourages reflection and discussion. Each of the four general areas includes several *Skills and Indicators* reflective of practices that promote social emotional competence in young children. The Indicators are detailed phrases that enable the user to “dig a little deeper” in identifying and pinpointing skills that may or may not be present. A column entitled *Observations/Evidence* allows the user to write thoughts, suggestions, strengths, and needs concerning either the specific *Skills or Indicators*. Three levels of skill, *Consistently, Occasionally, and Seldom*, permit users to record their perceived skill level for each Indicator by checking the appropriate box. Users should be consistent in their appraisal of skills

across the three levels, *Consistently, Occasionally, and Seldom* (i.e., across all children in the classroom, target child or specific groups of children, environment of all classrooms, etc.). The final column allows the team to indicate whether or not an indicator should be a *Target for Training*. Following each section is a space for writing additional comments. The team or individual may wish to delineate specific training requests, professional development opportunities, or encouragement in the *Comments* box.

Use of the Action Plan: The *Action Plan* takes the users to the next step once they have determined what specific *Skills and Indicators* from the *Inventory* they want to target for training. In the first column of the *Action Plan*, users should check those Skills or Indicators they previously identified as targets for training. In the second column, teachers and support personnel (e.g., trainers, mentor coaches, administrators) should work together to identify what strategies they will each use to help the teaching team implement the new practices. The third column allows users to identify *Resources and Supports* that will be necessary to successfully complete the activities or strategies listed in the second column.

Completion Dates: Users may complete the *Inventory* and *Action Plan* at different times as a way of determining their progress toward addressing specific skills targeted for training. Different color inks corresponding to the dates completed can be used when completing the tool in order to highlight changes over time.
